

## Summary

Pack Types in Orchestrated involves both a table that stores all the possible Pack Types and the Pack Type selection field on the Item Master. For many Orchestrated reports and screens to operate effectively, you need to have the Pack Types set up correctly on all item master data.

Many new reports and screens rely on the new Pack Types in Orchestrated 3.0, so you should plan to update your existing items to use the new Pack Types as soon as possible.

## Columns in the Pack Type Table

The Pack Type Table in Orchestrated has new columns to enable additional reporting metrics. New fields include

- Hectoliters
- Weight
- Case Equivalent
- Pallet Spot Quantity

## Pack Type records

Orchestrated will automatically create new Pack Types in your Pack Type table. We added new pack types to the table based on best practices from existing customers and the new reports that have been built for Orchestrated.

*Examples:*

*Formerly, pack types had codes such as 20005 for a 1/2 BBL Keg. Now in Orchestrated, the code is K12 instead of 20005.*

*Another example: 10005 was the old code for 4/6/12 case of bottles. The new code for that pack type is B4612*

Below in the Details section you will find instructions on how you can update your items to utilize these new more descriptive Pack Types.

## New Location of Pack Type Field on Item Master

The Pack Type selection field on the item master has been moved from the UDF window to the header of the Item Master Data screen.

The screenshot shows the 'Item Master Data' window. The 'Pack Type' field is now located in the header area, next to the 'Bar Code' and 'Unit Price' fields. A red arrow points to this field, which is currently set to 'Case 2/12/12 Btl'. Another red arrow points to a dropdown menu on the right side of the screen, which contains a list of all pack types, including new ones added by OBeer. A red box highlights this dropdown menu with the text: 'New Pack Type Field on Item Master' and 'Drop down of all Pack Types (includes all new pack types added by OBeer)'. The main form contains various fields for item details, including 'Item No.', 'Description', 'Item Type', 'Item Group', 'UoM Group', 'Price List', 'Process Type', 'Tax Liabilities', 'Manufacturer', 'Additional Identifier', 'Shipping Type', 'Serial and Batch Numbers', 'Management Method', and 'Management Method'. The 'Active' radio button is selected.

Item No.	Manual	1001-B212
