

## Summary

The Orchestrated Inventory app facilitates the processing of sales orders, purchase orders, inventory counts and inventory transfers.

You're shipping out finished goods, merchandise, and other goods and your team will need to ship those items out of Orchestrated. The Inventory iPad app lets anyone ship items from a sales order directly on the dock without having to log into Orchestrated.

You're receiving in orders of raw materials, brewing supplies, along with merchandise and goods to sell out of your taproom. Your team needs to receive those items into Orchestrated to bring them into inventory first. The Inventory iPad app lets anyone receive in items from a purchase order directly from the warehouse floor without having to log into Orchestrated.

All companies complying with TTB regulations are required to count inventory at a minimum of once per month and often do counts at the batch (or lot) level. The Inventory iPad app lets anyone count inventory and submit the counts to Orchestrated without having to log into Orchestrated. Save your warehouse staff from excessive time and your accounting team from frustration with the Inventory iPad app.
