

# Overview Of The Barrel Management Console

## Summary

The Barrel Management Console has three tabs: Home, Management, and Setup. You should be able to manage all of your barrel activities from within the BMC.

## Home Tab

The screenshot shows the 'Barrel Management Console' interface. At the top, there are three tabs: 'Home' (highlighted with a red box), 'Management', and 'Setup'. Below the tabs, there are filters for 'Location' (Distillery #1), 'Status' (Planned/Releas), 'Start Date' (06/20/16), and 'End Date' (07/08/17), along with a 'Refresh' button. Below the filters, there are two buttons: 'Fill Barrels' and 'Dump Barrels'. The main area contains a table of 'Production Orders' with the following columns: S, Tank, Pdo #, Item Code, Item Name, Brand, Batch, MPN, Prod Date, Prod Time, Plan Qty, Issued, and Received. The table contains 14 rows of data.

The **Home** tab is your place to execute daily production activities. It's built like any other worksheet in Orchestrated. Along the top are filters for the list of production orders below. Each production order is a step in filling and dumping barrels, both of which can be executed from this window (this process starts here).

The **Management** tab lists all your barrels with their current contents (if any) and associated data. There are a number of fields to filter the list by in case you have hundreds or thousands of barrels! You can select barrels from this list and perform several actions using the options on the left:

- **Receive**: bring barrels into stock, whether filled or empty
- **Retire**: remove barrels from your active stock, whether filled or empty, including selling them to a third-party
- **Transfer**: between warehouses or just moving the specific bin location of a barrel
- **Dumping**: take liquid out of one or more shells, removing all the contents or a partial amount
- **Add Adjuncts**: add any inventory item to the contents of a shell
- **Adjust Volume**:
- **Print Tags**
- **Edit**: general purpose edit
