

If you are in your live database and want to switch to your test database (or vice versa) this can easily be done by going to Administration > Choose Company.

- If you're in our OnDemand environment: you can simply double click the database you wish to log in to.
- If you're in our Enterprise environment, select the database you wish to log in to and then *enter your username and password* at the top of the window prior to clicking "OK".

Note: It appears your password is saved but it is in fact not stored by SAP so it must be entered every time.
