

[Sales Order Fulfillment Rates & Details] - Fulfillment Rate Double If Cancellation Document Exists

Issue

Scenario: You run the Sales Order Fulfillment Rate & Details Report and to see what you have fulfillment based on your search parameters. Within the results, you have a one or more that has a canceled invoiced and another one created from the Sales Order after to replace the erroneous one.

Expected Results: The delivered and fulfillment rates factors in the cancellation and does not include it in the report, only the one replacing it

Actual Results: The reports add the delivered, and subsequently inflates the fulfillment rate, from the cancelled document

Resolution

To be resolved in a future released
