

[IPad Inventory App] - Batch-Managed Item(s) With Purchasing UoM Cannot Be Received

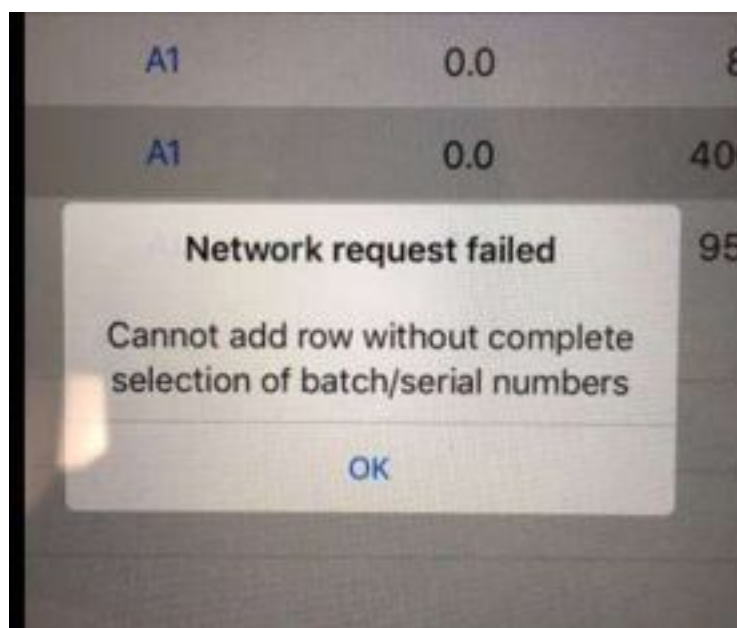

Issue

Scenario: You have one more items that are batch-manage. Additionally, you also have a Purchasing UoM set to convert each unit to X amount when brought into inventory.

You have a purchase order in the system for that item and plan on using the inventory into stock via the Inventory App. When doing so you are prompted to end the batch ID and then confirm the submission

Expected Results: You are able to complete the order and the correct amount of units are brought into stock

Actual Results: It gives you a "Cannot add row without complete selection of batch/serial

numbers

Workaround

The issue only affects batch-managed items with a unit conversion set. Therefore, any of these orders with such items must be processed in the desktop version for now.

Resolution

An update to the back-end of the iPad Inventory App is scheduled for a future

release. Version 4.7.1.1
