Report Summary

Printed Report Title: Orchestrated Audit Items by Pack Type

Displays a list of pack types and the items that are assigned to each. Also shows conversion rates and pallet quantities for each pack type. Possible issues with conversions are highlighted.

This report also indicates items that might need a Pack Type assigned.

Default Location In Orchestrated

Base Module: Inventory > Inventory Reports > Orchestrated Inventory > Setup Audit Reports

Reports Module: Reports > Inventory > Orchestrated Inventory > Setup Audit Reports

These are the standard default locations. Your locations may be different.

Typically Used by

Very handy after you initially set-up new items to verify that key Pack Type information is correct

Add to a quarterly or annual auditing schedule to check and verify key system information.

Key Requirements

 Requires that Pack Types are used for all beverage items

Tips

The "Conversion Accuracy" is the standard deviation of all of the associated conversions for that Pack Type. This helps you locate conversions that are not close enough to standard accepted values.   .02% or less is generally acceptable.
