

Summary

Trying to figure out how to cut costs? Want to stretch that almighty purchasing dollar? The Purchasing cube available in Advanced Analytics can help answer those questions.

Description

Built on Excel's PowerBI platform, the next generation of advanced analytics marries simplicity and sophistication. Users who are already familiar with Pivot tables can expand the pre-defined templates or keep the existing. Purchasing focuses on what is bought and pricing. Leverage this tool to get on top of supply chain management.

Recent Changes

The purchasing cube has been completely rewritten and now includes support for the OnDemand environment.
