

FEFO Configuration on Auto-Select All

Summary

FEFO is also known as First-Expiry-First-Out and useful for goods like fruits, sugared adjuncts, and really anything that expires. You can now set auto-select all to take FEFO into account if your company selects lots based on that methodology.

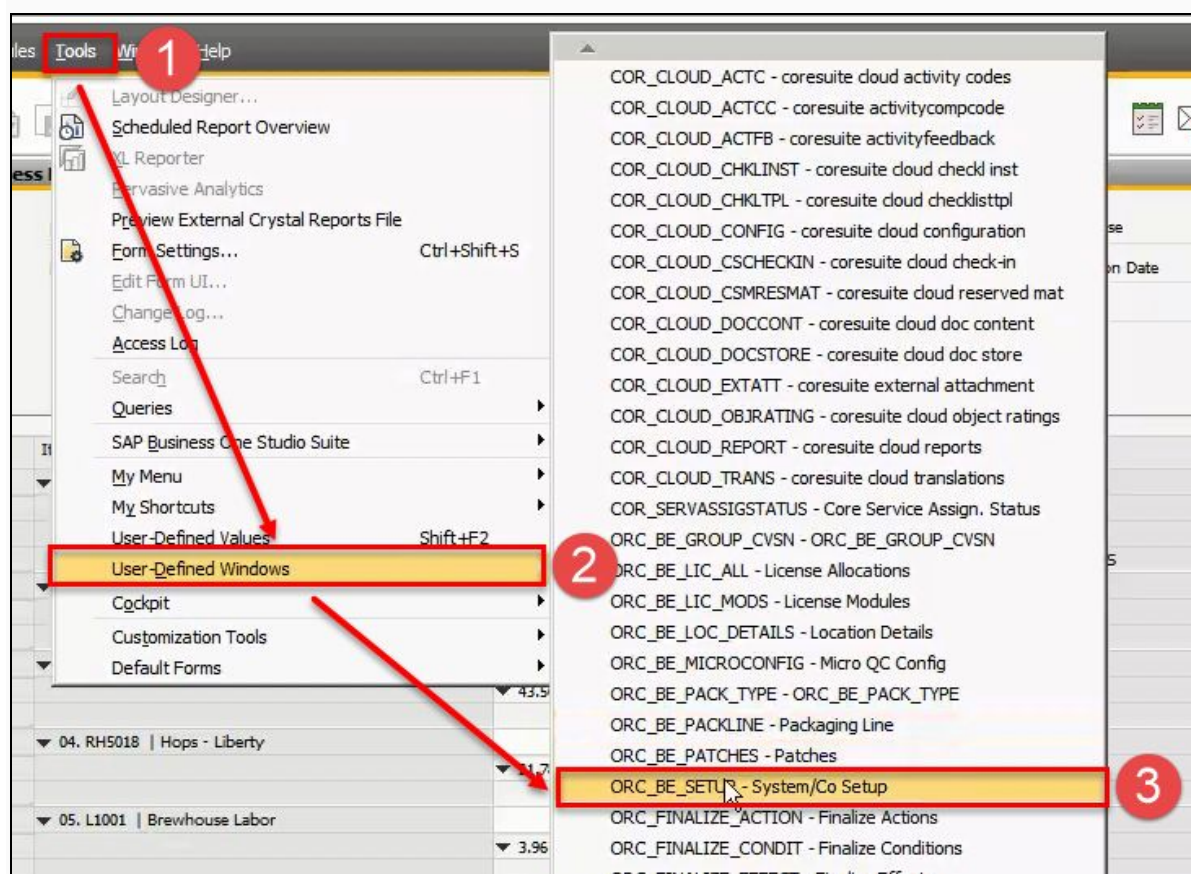

This is in addition to FIFO. The setting is at the company level and applies the logic to the item itself.

NOTE: For FEFO to be taken into account all batches for that specific items must contain an expiration date.

Configuration

Navigate to the setup table.

1. Tools → User-Defined Windows → ORC_BE_SETUP

2. Scroll until you find the field *Auto Select All Type*

3. Set from I - FIFO to E - FEFO

System/Co Setup

#	Sign Batch On	Next Master ...	Express: In...	Scheduler ...	Reports V...	E...	Auto Select All Type	Web Se...	Vol...	Setup A...
1	ation	197	<input type="checkbox"/>	2.0.3.0		<input checked="" type="checkbox"/>	FIFO	http://ot-rc Bar		Automat
2	ation	1	<input type="checkbox"/>		0.0	<input checked="" type="checkbox"/>	E - FEFO	http://ot-rc Bar		Automat

OK Cancel

Now when you bring in your batch managed raw materials, be sure to enter an *Expiration Date* on the batch. This can be performed after the batch has been received into stock.
