

BMC Setup Tab

This page covers the setup of the Barrel Item Templates in the Barrel Management Console section of Orchestrated.

Barrel Item Template Video:

What is a barrel item template?

A barrel item template is how we define a barrel within OrchestratedBEER or OrchestratedSPIRITS. This is an item that represents the wood itself. Barrels have various stages of their life in production and so there are various "templates" to setup. These templates represent those stages. Liken them to a default, if you will.

Barrel Management Console - Barrel Template Setup

Proceed to the Barrel Management Console. Go to [Production](#) > [Production Forms](#) > [Barrel Management Console](#). From there click on the Setup tab.

Barrel Management Console

Home Management Setup

BRL1003-NEW	Barrel 53G - WALNUT - NEW	WAL	Bourbon	Barrel 53	New	Available					
BRL1004-EMPTY	Barrel 59G - OAK - EMPTY	OAK	Bourbon	Barrel 59	Used	Available					
BRL1004-FLD	Barrel 59G - OAK - FILLED	OAK	Bourbon	Barrel 59	Used	Filled					

Once the item code has been populated, you'll need to enter an ID Prefix, then select the type, size, condition, and status. You may also choose to use the Attribute fields for additional data.

The Type, Size, and Status values can all be edited on the Setup Screen of the Barrel Management Console.

To add, edit or remove a template, highlight the particular template row and click **Edit** to open up the barrel template window.

Barrel Item Template

ItemCode	<input type="text" value="BRL1001-EMPTY"/>	Contents	<input type="text"/>
ItemName	<input type="text" value="Barrel 53G - OAK - EMPTY"/>	Proof	<input type="text" value="0.00"/>
ID Prefix	<input type="text" value="ORC"/>	Attribute 1	<input type="text"/>
Type	<input type="text" value="Bourbon"/>	Attribute 2	<input type="text"/>
