Can I Add Fields To Production Orders That Aren't Displayed/Available?

Orchestrated has a number of fields called User-Defined Fields (UDFs) that we have added

originally to help process orders (Sales Orders, Purchase Orders and Production Orders – along

with the related documents like Deliveries, Goods Receipt PO and Invoices). For more information

on adding additional UDFs see

https://support.orchestrated.com/hc/en-us/articles/207139807-Create-User-Defined-Fields.
