

## **[Orchestrated Production App] - Production Orders Of The Same Date Are Not Chronologically Order By Time**

### Issue

Scenario: You have several Production Orders (PdO) with the same Due Date. Although the PdOs are created one after another, the Production Time is not set chronologically (e.g. PdO 1 @ 3PM, PdO 2 @ 5PM, PdO 3 @ 11:30AM).

Expected: The list of PdOs in the Production App will be ordered by date first, then time.

Actual: The PdOs sort by date, but then is chronically ordered by when the PdO was created.

### Workaround

There is no current work around.

### Resolution

An update to the backend of the mobile production apps is scheduled for a future release.

Version 4.5.1.0
