Summary

Want to analyze rates of sales? Export sales into and create your own secret spreadsheets? The Sales module as part of Advanced Analytics assists in answering those questions and more.

Description

Built on Excel's PowerBI platform, the next generation of advanced analytics marries simplicity and sophistication. Users who are already familiar with Pivot tables can expand the pre-defined templates or keep the existing. Sales focuses on package type, brand data, customer, even the individual sales rep. Slice and dice the data with ease.

Recent Changes

The sales cube has been completely rewritten and now includes support for the OnDemand environment.
