

# Packaging QC

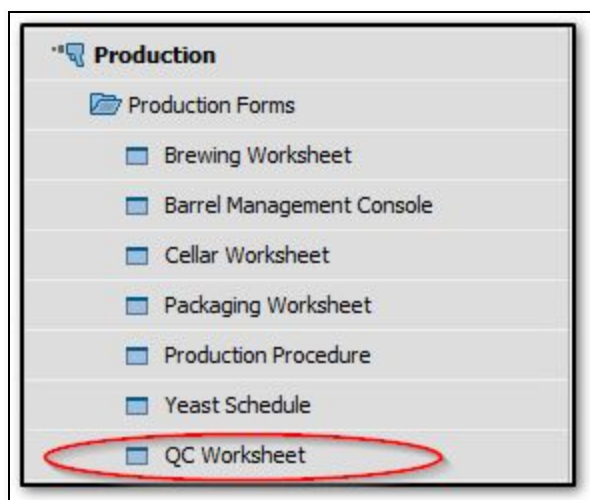

## Summary

The Packaging QC is a screen launched from the Packaging Sheet, which allows for data capture on a Packaging Run. The data captured on the Packaging QC form is designed to be associated with multiple PdOs (the various packages being processed from the bright tank).

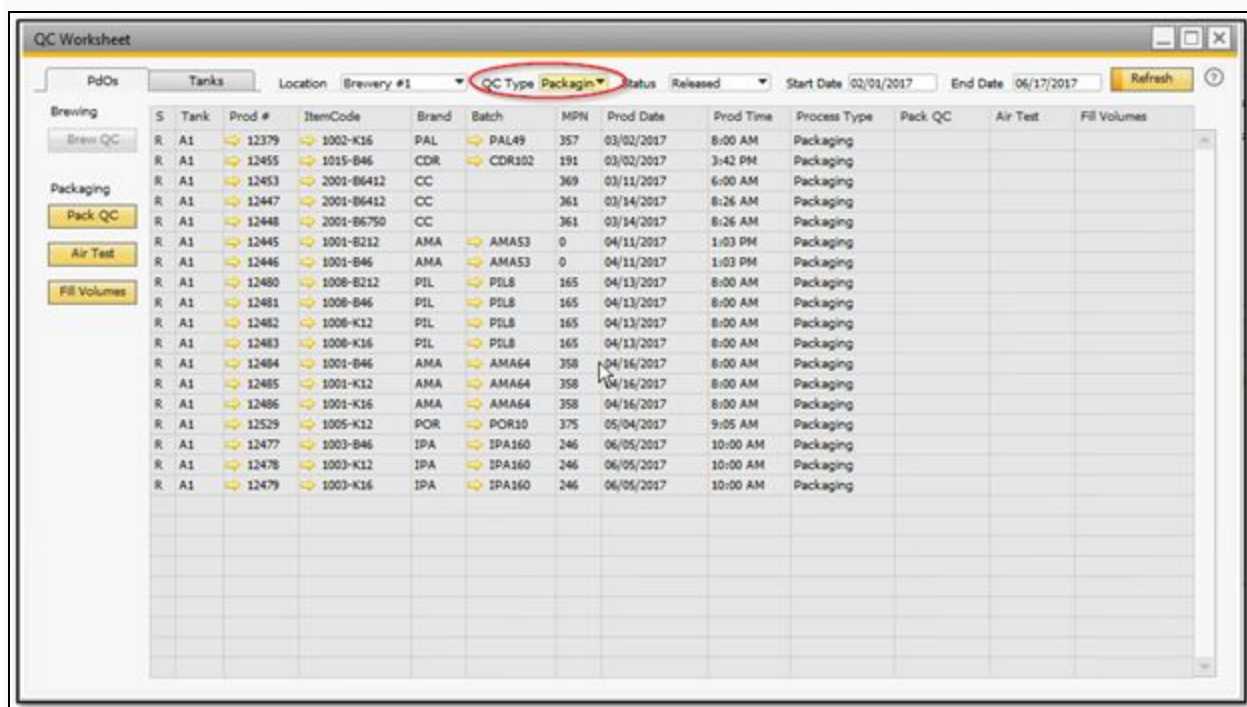

## Launching the Packaging QC Screen

There is two ways to access the Packaging QC Screen.

1. On the Packaging Sheet, highlight a production order and then click the Packaging QC button.
2. Go to Production > Production Forms > QC Worksheet

Once on the QC Worksheet, change the QC Type filter to "Packaging"

Highlight the PdO that there is QC data for click **Pack QC**
