Total Barrels 628

On the Rebarreling Screen header: enter your Final Item and Batch - the item and batch that will exist in the Destination Barrels. These may match the current contents of the barrel(s) or they may be different depending on the scenario.

Adjust your Dump Qty if necessary.

Enter the destination barrels in the Barrel ID column.

Adjust the Shell type if necessary - this will be the shell status of your Source Barrels once you have completed Rebarreling.
