[Production App] - Cannot Edit Warehouse On Line Item From Packaging Section

Issue

After you have released a packaging Production Order in Orchestrated, then go into the Orchestrated Production App and try to change the From warehouse on one of the line items (such as the Bright Beer), it doesn't allow you to select any other warehouse even though it's assign to multiple ones.

Workaround

You have to log into Orchestrated and make the change there and the Production Order will update on the App.

Resolution

An update to the backend of the mobile production apps is scheduled for a future release.

Version 4.4.2
