

Summary

With the new Orchestrated 4.3 Scheduler, you might have added a note and even though your settings are set to show opened and close notes, they don't appear on the scheduler.

The reason is the Process Type must be set on the note before it will show up.

Step by Step Guide

To do so, follow these steps.

1. Go to Production->Scheduler Notes
2. Find your existing note (or add a new one).
3. In the lower right hand corner set the Process Type field to "None"

Scheduler Notes

DocNum Status

Start Date Start Time

End Date End Time

Subject

Details

Warehouse Process Type

Add Cancel

You should now see that note on the scheduler.

Version 4.5.1.0
