

Encompass

TECHNOLOGIES

ASSET MANAGER

Implement Encompass Asset Management with ease in order to simplify and streamline your asset processes without having to use a third-party application. Browse the asset library, request assets, and execute asset placement on the industry's only iOS and Android friendly solution. Save time, stay informed, and take action based on detailed reports to optimize your business operations.

SAVE TIME

- Receive multiple assets of the same type in a single transaction
- Easily access an image library displaying all point of sale assets
Add supplier provided images to the asset record, without unboxing and building assets
- Request multiple assets at once
Simply request the asset, then adjust the quantity - on average, this saves 15 minutes per stop
- Place and confirm duplicate assets simultaneously

INCREASE VISIBILITY

- Inventory accuracy provides a clear view of available asset quantities
- Utilize the image library to promote available assets to customers
- Add special delivery and placement instructions in the asset delivery planner to ensure proper placement and asset exposure

STREAMLINE MANAGEMENT

- Managers can easily monitor which retailers are receiving assets
Make informed decisions based on sales metrics found in the Command Center Dashboard
- Filter asset requests by the sales rep who requested it
